Florida Fish and Wildlife Conservation Commission
Division of Freshwater Fisheries Management

Revised July 2014

Recommended Stocking Rates

100 Bass / Acre
500 Bream / Acre
100 Channel Catfish / Acre with other fish present
Or 1,000 / Acre by themselves with feeding
*****DO NOT OVERSTOCK*****

NOTE: There are various methods for shipping fish. Please check with each dealer regarding their methods of delivery.

Many out of state dealers produce and distribute fish which are prohibited or require a special permit in order to be introduced into waters of the State of Florida. Importation and/or stocking of restricted species is in violation of Florida law. You may face stiff fines and be held liable for the removal of all restricted fish you introduce. Check with your local Fish & Wildlife Conservation Commission if a dealer tries to sell you any species other than those listed on this leaflet.

For more information about stocking largemouth bass in Florida, please visit

<http://myfwc.com/news/news-releases/2012/april/04/stock-bass/>

Additional questions? Please contact Rick Stout at (352) 583-4518 extension 21001

TO FIGURE THE ACREAGE OF YOUR POND AND NUMBERS OF FISH TO PURCHASE FOR A BALANCED POPULATION, USE THE FOLLOWING FORMULA:

LENGTH (feet) X WIDTH (feet) = Area

$$\frac{\text{Area}}{43,560} = \text{TOTAL ACREAGE}$$

TOTAL ACREAGE X 500 = BREAM PER ACRE
TOTAL ACREAGE X 100 = BASS PER ACRE
TOTAL ACREAGE X 100 = CATFISH PER ACRE

EXAMPLE: A pond 1,000 feet long by 500 feet wide.

$$1,000 \text{ feet} \times 500 \text{ feet} = 500,000$$

$$\frac{500,000}{43,560} = 11.5 \text{ Acres}$$

11.5 X 500 = 5,750 Bream to stock this pond.

11.5 X 100 = 1,150 Bass to stock this pond.

11.5 X 100 = 1,150 Catfish to stock this pond.
