# Florida Land Steward Webinar Series: Forest Recovery

---

**Beginning September 10, 2020 at 2 pm ET (1 pm CT)**

**Continuing on 3 consecutive Thursdays through October 1**

Landowners in the central Panhandle region of Florida are ready to move forward with restoring their property after the devastation of Hurricane Michael in 2018, but questions still linger for many. What about the long-awaited disaster recovery assistance? What is the status of timber markets? What kind of trees should I plant? Are there invasive species that we need to look for? Join us to get the information you need to take the next steps in forest recovery.

---

Please [register](#) for each webinar you wish to attend.

A detailed agenda and presenter information is on the second page of this announcement.

**September 10, 2020 | 2:00-3:00 pm ET: Hurricane Recovery Assistance and Timber Market Update**

**Continuing Education Credits:** These Webinars have been submitted for 1.0 Cat. 1 SAF CFE credit each (4.0 total for the series), pending approval. You must attend the full hour to qualify for CFE credit.

United States  
Department of  
Agriculture

The UF/IFAS Florida Land Steward Program is supported by the USDA Forest Service through the Florida Department of Agriculture and Consumer Services Florida Forest Service, National Wildlife Federation, University of Florida IFAS, Florida Tree Farm Program, Florida Sustainable Forestry Initiative Implementation Committee, and other sponsors.

## Agenda

(each session will be 1 hour in length but we will allow additional time for questions as needed)

### Webinar 1: Hurricane Recovery Assistance and Timber Market Update

September 10, 2020 | 2:00-3:00 pm ET

Daniel Stevens, Cooperative Forestry Assistance Supervisor, Florida Forest Service  
Wesley Sapp, Deputy State Disaster Recovery Coordinator, Florida Division of Emergency Management  
Laura Bosworth, Director of Forestry and Regulatory Affairs, Florida Forestry Association

The State of Florida and the U.S. Department of Agriculture (USDA) have announced the sign-up period for the [Timber Recovery Block Grant Program](#) to help Florida's forest landowners and timber industry recover following Hurricane Michael. The sign-up period for the Block Grant Program is until November 20, 2020. Updates on the USDA's Emergency Forest Restoration Program and timber markets in this region will also be discussed.

Register in advance for this webinar: [https://ufl.zoom.us/webinar/register/WN\\_HPxHw40QTWGsY02dUbXDMQ](https://ufl.zoom.us/webinar/register/WN_HPxHw40QTWGsY02dUbXDMQ)

### Webinar 2: Which Pine is Right for My Property?

September 17, 2020 | 2:00-3:00 pm ET

Stan Rosenthal, UF/IFAS Extension Forestry Agent Emeritus and Forest Advocate, Florida Wildlife Federation, Natural Resource Planning Services

Your site(s) and management objectives should guide your choice of tree species to plant.

### Webinar 3: Keys to Success with Longleaf Pine and Enviva Biomass Partnership

September 24, 2020 | 2:00-3:00 pm ET

Ad Platt, Vice President for Operations, The Longleaf Alliance  
Ben Larson, Director of Sustainability, Enviva  
Shawn Cook, Sustainability Forester, Enviva  
Billy Clark, Commodity Manager, Enviva

If longleaf pine is right for your objectives and your site, this presentation will share keys to success. This species once covered more of the South than any other, but to restore a longleaf pine forest we've learned to manage longleaf as longleaf. It is different, and so is our management. The Enviva biomass plant is partnering with The Longleaf Alliance to implement a longleaf restoration-oriented sourcing at Cottondale to help land managers and landowners in this region to restore longleaf pine forests.

Register in advance for this webinar: [https://ufl.zoom.us/webinar/register/WN\\_G96IdYpeQPOn8NwnndqQ7w](https://ufl.zoom.us/webinar/register/WN_G96IdYpeQPOn8NwnndqQ7w)

### Webinar 4: Invasive Species Identification and Control

October 1, 2020 | 2:00-3:00 pm ET

Brian Pelc, Restoration Project Manager, The Nature Conservancy

Sites disturbed by the storm have been the perfect medium for invasive plants to establish. Existing and new infestations of invasive plants like cogongrass will be inadvertently spread by heavy equipment during the cleanup and site preparation phases. Be on the lookout for invasive plants and treat them as soon as possible.
