

COMMUNITY SERVICE

One and done- usually a one time event where the project is completed in one day

In 4-H, youth should select the project, vote on it, and adults support and guide them

Often done in partnership with other community organizations, such as a food bank or Parks and Recreation

Impact is measured in terms of pounds of food collected, bags of trash collected, etc.

SERVICE LEARNING

Long term project, often completed over the course of several months or years.

Youth identify and issue they want to address, study that issue, and brainstorm solutions to solve that issue.

Youth vote on the best solution and devise a plan of action. Often, this includes developing a proposal for county government or other community organizations.

Adults guide and support youth as they implement the solution.

Impact is usually measured in terms of attitude or behavior change or economic value
