23<sup>rd</sup> Annual

# Florida Bull Test Sale

**New this year: Bulls will not  
be brought to the ring for  
the sale. Bulls will be available  
for viewing in the pens from 8  
am until the end of the sale**

Internet bidding available  
(See inside for details)

**UF** UNIVERSITY of  
FLORIDA  
IFAS Extension

**Saturday, January 14, 2023**

Lunch 11:30 (Central Time)  
Sale 12:30 (Central Time)

**Office: 850-526-1611  
Sale Day Phone: 850-526-1620**

**North Florida Research and Education Center  
Beef Cattle Unit  
Marianna, Florida  
4925 Highway 162, Greenwood, FL**

## BULL TEST ADVISORY COMMITTEE

Dr. Todd Anderson	Mr. Terry Harris	Mr. Jeff Snell
Dr. Nicolas DiLorenzo	Mr. Larry Warden	Mr. David Thomas
Dr. Jose Dubeux	Mr. Hubert Hightower	Mr. Herman Walker
Dr. Angela Gonella-Diaza	Mr. Doug Mayo	Mrs. Kalyn Waters
Mr. Winston Griffith	Mr. Mark Mauldin	
Mr. Nick Griffith	Mr. Jerry Osteen	
Mr. Jacob Gilmore	Mr. Rodney Sewell	

## UNIVERSITY OF FLORIDA, ADMINISTRATION

Dr. Kent Fuchs, President, University of Florida  
Dr. Scott Angle, Vice President for Agriculture and Natural Resources  
Dr. Dean Pringle, Professor and NFREC Center Director  
Dr. John Arthington, Chair and Professor, Animal Sciences  
Dr. Nicolas DiLorenzo, Professor and Florida Bull Test Coordinator  
Mr. David Thomas, Beef Unit Manager and Bull Test Foreman

## TERMS AND CONDITIONS

1. Each bull will be sold to the highest bidder.
2. The auctioneer will settle any dispute as to bids.
3. The terms of the sale are cash or check payable to the **Jackson County Cattlemen's Association**.
4. Each bull becomes the risk of the new owner as soon as sold in the auction ring. Every precaution will be taken for the safety of all bulls until they are loaded.
5. Bulls will be attended to **no more than 4 hours after the sale** unless other arrangements are made.
6. A certificate of registry, properly transferred, will be furnished by the owner for each bull sold. Any exception will be announced from the auction box.
7. Health certificates will be furnished on each bull sold upon request.
8. All bulls have passed a breeding soundness exam and should have the ability to settle healthy cows with the exception of:
  - a. Injury or disease occurring to the bull after the sale.
  - b. Gross negligence or willful misconduct on the part of the purchaser.
9. Concerns regarding the fertility of the bull should be resolved between purchaser and consignor.
10. A consignor may not "no sale" a bull during or after the sale.
11. Certification of parentage testing of bulls is strongly recommended for the 2022 sale and may be required in future sales.
12. The sale is a contract between the consignor and the buyer. **The University of Florida, the Jackson County Cattlemen's Association, their employees, and representatives are merely facilitators and not parties to the contract.**

**ALL PERSONS WHO ATTEND THIS SALE DO SO AT THEIR OWN RISK. THE OWNERS AND SPONSORS ASSUME NO LIABILITY, LEGAL OR OTHERWISE, FOR ANY ACCIDENTS OF ANY NATURE.**

Dear Cattlemen:

Welcome to the 23<sup>rd</sup> Annual Florida Bull Test Sale. The objective of this test is to evaluate the performance potential and breeding soundness of consigned bulls. This year was the eighth year in which individual feed efficiency was established on all bulls.

The Florida Bull Test consists of a 112-day performance test plus a breeding soundness evaluation on every bull that qualifies for the auction. When the bulls arrived at the NFREC Feed Efficiency Facility (FEF), they were sorted into contemporary groups, and then moved into pens where they were adapted to a soy hull and corn gluten-based diet for three weeks, before initiating the test. The bulls remained in the FEF for 56 days to collect intake data and were then relocated to 3.25-acre pastures for the remaining 56 days of the test, where they received the same diet. Animal performance, specifically average daily gain (ADG), was calculated using only the official starting and finishing test weights. Throughout the test, bulls were observed and screened for structural soundness and disposition. Bulls deemed to be structurally unsound or of poor disposition did not qualify for the sale.

As you may note, the bulls had an overall ADG of 3.81 lb/day. The average weight per day of age was 3.13 lb/day. Average daily feed intake during the first 56 days of the test was 23.61 lb/day (on a dry matter basis) and average feed:gain ratio of 7.34 pounds of feed for every pound of gain.

A significant portion of the test is the inclusion of feed efficiency of individual bulls. To rank the bulls on feed efficiency we use residual feed intake (RFI), which is the difference between actual feed intake and expected feed intake. The more negative the number, the more efficient the bull. During this bull test the RFI of bulls ranged from -5.38 to 5.38 lb/d. **Therefore, the most efficient bull consumed 5.38 lb per day less feed than expected for his gain. This equates to more than 1,960 lb per year less feed than that bull was expected to consume!**

Our staff has worked hard to provide the best care possible for these bulls. We believe each bull has been given the chance to express his own genetic potential for performance and fertility. Thank you for making our sale stronger year after year. We look forward to visiting with you about the bulls either before or on sale day.

Sincerely,

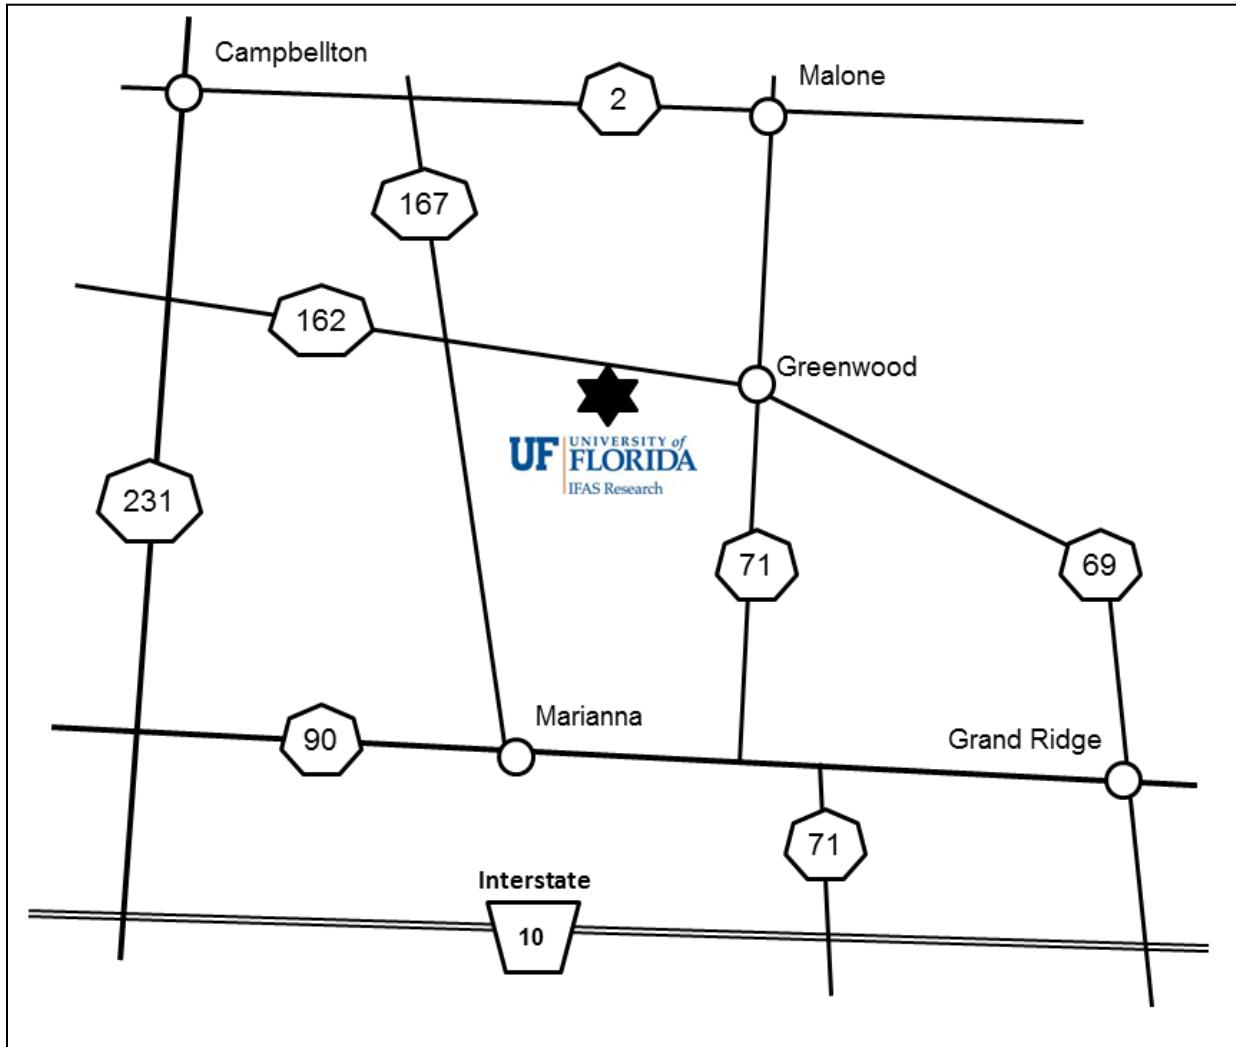

Florida Bull Test Committee

## BULL TEST SALE LOCATION

4925 Hwy 162, Greenwood, FL

The sale will be held in the sale pavilion at the NFREC-Marianna Beef Unit, home of the Florida Bull Test. The Beef Unit/Bull Test is located 1.4 miles west on Highway 162 from the traffic light in Greenwood. The unit is 11.4 miles east of Highway 231 on Highway 162. From I-10, take Highway 71 north at exit 142, through Marianna to Greenwood (approximately 11 miles). An alternative route for those coming from the east on I-10, is to exit at 152 at Grand Ridge and take Highway 69 to Greenwood. From Dothan, AL take Highway 231 south and turn left on Highway 162 (look for green bull test sign).

**ANNOUNCEMENTS FROM THE AUCTION BOX WILL TAKE PRECEDENCE OVER  
THE PRINTED MATTER IN THIS CATALOG AND ALL OTHER ANNOUNCEMENTS**

**SALE ORDER:** The sale order is determined by test index.

Index = average daily gain (ADG) on test + weight per day of age (WDA) at the end of the test.

**ELIGIBILITY FOR SALE:** Bulls eligible for the sale indexed 90 or greater on the test.

**SALE ORDER BY BREED**

ANGUS	BRANGUS	RED ANGUS	RED BRANGUS	SIMANGUS	SIMMENTAL

Several bulls are listed in the catalogue to have a retained semen interest (designated by a "Y"). This indicates that in the event the buyer purchases a bull and chooses to collect semen on that bull, the consignor is entitled to one third of the semen rights but is also obligated to one third of the semen collection costs. However, if the buyer does not elect to collect or market semen on the bull, then there is no obligation to the consignor. In addition, the buyer has 100% ownership of the bull and retains all salvage value when marketed. Bulls with certified parentage testing are designated with a "PT" or will be identified as Y in the "Parent Verified" section.

## **DEFINITION OF TERMS**

<b>ET</b>	<b>Embryo Transfer</b> Embryo transfer
<b>EPD</b>	<b>Expected Progeny Differences</b> Predicts the differences expected in performance of future progeny of two or more sires of the same breed when mated to animals of the same genetic potential.
<b>CED</b>	<b>Calving Ease Direct EPD</b> Based on calving ease scores and birth weights. The EPD indicates the influence of the sire on calving ease in purebred females calving at 2 years of age.
<b>BW</b>	<b>Birth Weight EPD</b> A predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires; expressed in pounds.
<b>WW</b>	<b>Weaning Weight EPD</b> A predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires; expressed in pounds.
<b>YW</b>	<b>Yearling Weight EPD</b> A predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires; expressed in pounds.
<b>Milk</b>	<b>Maternal Milk EPD</b> A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.
<b>Scrotal</b>	<b>Scrotal Circumference EPD</b> A predictor of the difference in transmitting ability for scrotal size compared to that of other sires; expressed in centimeters.
<b>IMF</b>	<b>Intramuscular Fat - Marbling EPD</b> A predictor of the difference in USDA marbling score of a sire's progeny compared to that of other sires; expressed as a fraction.
<b>REA</b>	<b>Ribeye Area EPD</b> A predictor of the difference in ribeye area of a sire's progeny compared to that of other sires; expressed in square inches.
<b>BF</b>	<b>Fat Thickness EPD</b> A predictor of the difference in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires; expressed in inches.
<b>ADG</b>	<b>Average Daily Gain</b> Average daily gain on test during the 112-day FL Bull Test.
<b>WDA</b>	<b>Weight per Day of Age</b> Weight per day of age from birth until the end of the final weight of the FL Bull Test.

<b>Index</b>	<b>Index Ratio</b>
	This test index is used to rank the bulls on performance and is the sum of ADG and WDA expressed as a ratio of each individual bull to the average index for the group. A ratio of 100 is average. This index was used for the final rankings at the end of the test.
	<b>Frame</b>
<p>This score describes the skeletal size of cattle and is expressed as a score from 2 to 10. With appropriate height growth curves, most animals should maintain the same frame score throughout their life, while their actual height increases with age. This allows one frame score value to be used regardless of when the animal was evaluated. However, the frame score will change for animals that mature earlier or later compared with average animals.</p>	
<b>\$VALUE INDEXES</b>	
	\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.
<b>\$API</b>	<b>All-Purpose Index</b>
	The expected average performance of progeny of Simmental bulls used on the entire Angus cowherd, with a portion of the daughters being retained for breeding and the remaining progeny being put on feed and sold grade and yield.
<b>\$TI/TSI</b>	<b>Terminal index</b>
	The expected average profit per carcass of progeny of bulls mated to British-cross cows, with all offspring placed in the feedlot and sold grade and yield. It includes growth and carcass information only.
<b>\$BMI</b>	
	This is an index to maximize profit for commercial cow-calf producers who use Hereford bulls in rotational crossbreeding programs on Angus-based cows. Retained ownership of calves through the feedlot phase of production is maintained and the cattle are to be marketed on a CHB pricing grid.
<b>\$CHB</b>	
	This is a terminal sire index, where Hereford bulls are used on British-cross cows and all offspring are sold as fed cattle on a CHB pricing grid. There is no emphasis on milk or fertility since all cattle will be terminal. This index promotes growth and carcass.
<b>\$C</b>	<b>Combined value</b>
	Expressed in dollars per head, this index includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd.
<b>\$W</b>	<b>Weaned Calf Value</b>
	The expected average difference in future progeny performance for preweaning merit; expressed in dollars per head. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

<b>\$F</b>	<b>Feedlot Value</b> The expected average difference in future progeny performance for postweaning merit compared to progeny of other sires; expressed in dollars per head.
<b>\$B</b>	<b>Beef Value</b> The expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires; expressed in dollars per head.
<b>PT</b>	<b>Parentage Testing</b> The use of genetic markers to determine the most likely sire and/or dam.

## **FEED EFFICIENCY DATA:**

	<b>Feed Efficiency Rank</b> Ranking from most efficient (low ranking) to least efficient (high ranking) compared to all bulls in the FL Bull Test.
	<b>Intake</b> The pounds (on a dry matter basis) consumed on a daily basis during the 56-day feed efficiency portion of the test.
<b>F:G</b>	<b>Feed to Gain ratio</b> The pounds of feed consumed per pound of gain per bull during the 56-d feed efficiency portion of the test.
<b>RFI</b>	<b>Residual Feed Intake</b> Calculated as the difference between actual average daily feed intake and expected daily feed intake for each bull based on their average daily gain on test during the 56-d feed efficiency portion of the test. This value was used as the criteria for Feed Efficiency Rank. Bulls with a low RFI are more efficient than bulls with a high RFI.
	<b>Adjusted</b> Because ultrasound measurements are taken on a single day, bulls vary in age. Therefore, measurements are adjusted to be on an equal age basis so that bulls may be compared with each other. When comparing ultrasound data between bulls, adjusted measurements are more reliable.

# **INTERNET BIDDING AND VIDEOS**

Internet bidding and videos of bulls are available through Cattle In Motion ([www.cattleinmotion.com](http://www.cattleinmotion.com))

Additional information on the 2022-23 Florida Bull Test may be accessed and downloaded at our website:
