

Murilo Morata

UF/IFAS Escambia County Agriculture and
Natural Resources Extension Agent I
Northwest Extension District

Profile

I'm originally from São Paulo State, Brazil, a country known for its strong agriculture industry. Coming from a farmer's family, I've always been passionate about agriculture.

I've spent much of my life around farming, constantly learning and making the most of every situation to build my skills. I specialized in plant science, focusing on row crops and using precision agriculture technologies to improve farming practices and promote sustainability.

My goal is to make life easier for farmers and those working with natural resources, helping them thrive in their businesses. Their success is my success.

Educational Programs

Northwest Florida Sustainable Agriculture

As the Agriculture and Natural Resources Agent, my mission is to promote sustainable and profitable agricultural practices. I collaborate closely with farmers and extension agents at county, district, state, and multi-state levels. By working with precision agriculture technologies and developing new management practices through research, we strive to enhance farming efficiency and productivity.

Utilization and Conservation of Natural Resources

Escambia County have several hundred ponds and small lakes, along with extensive forested areas. This program aims to educate and enhance the utilization of these natural resources by focusing on the management of weeds, water quality, and the licensing and management of timber production.

Experience

- Agriculture and Natural Resources Extension Agent – Escambia County – present
- Graduate Research Assistant – Auburn, AL – 2022 to 2024

Professional Preparation

- Master of Science in Plant Science – Auburn University, AL – 2024
